

SHASHIPAL CHOUHAN

Email: shashipal95@gmail.com | **Phone:** +91-7869605103 | **Address:** Indore, India
Website: shashipal.vercel.app | **GitHub:** github.com/shashipal95 | **LinkedIn:** linkedin.com/in/shashipal95

PROFILE

AI/ML professional skilled in building and deploying ML-based web applications on the cloud and designing data-driven BI dashboards. Experienced in building GenAI-LLM based RAG Application with a strong ability to adopt emerging technologies to deliver scalable and production-ready AI solutions.

TECHNICAL SKILLS

Programming - Python | **BI Tools** - PowerBI, Tableau | **Database** - MySQL | **Cloud** - AWS
ML - Scikit-learn, PyTorch, GitHub Action, Docker, MLFlow, FastAPI, DVC, Prometheus, Grafana
GenAI/ LLMs - LangChain, LanGraph, Pinecone, HuggingFace, Opik, MCP, ADK

EXPERIENCE

Software Engineer - AI/ML

Wayzon Technology

Remote

June/2023 - Present

- Engineered an **Agentic AI** application utilizing LLMs, LangChain, and Model Context Protocol (MCP); automated 5k+ employee policy queries and reduced manual HR workload by 40%.
- Fine-tuned LLMs** via QLoRA (4-bit) using PEFT; slashed VRAM consumption by 60% and enabled training of 7B+ parameter models on consumer-grade hardware while maintaining baseline performance.
- Streamlined LLM deployment via **vLLM** and Docker, maximizing GPU utility and reducing infrastructure costs by 25% through optimized batching and memory management techniques.
- Orchestrated end-to-end **MLOps pipelines** using DVC, MLflow, and FastAPI; containerized services with Docker and deployed on AWS ECS, improving scalability and reducing inference latency by 15%.
- Developed sales and revenue dashboards surfacing real-time KPIs, accelerating stakeholder strategic decision-making cycles by 25%.

Software Engineer – ML

Compunnel Digital

Noida

April/2022 - June/2023

- Developed a scalable feature extraction pipeline using Pandas and Scikit-learn, processing **20K+** records weekly and slashing model training time by **35%**.
- Architected an AI-driven **Speech-to-Text (STT)** workflow to process **20K+** daily call transcriptions, achieving an 80% reduction in manual processing overhead.
- Engineered Computer Vision models for automated Image Quality Assessment; utilized Transfer Learning to improve evaluation throughput and efficiency by 35%.
- Enhanced interactive **Power BI** dashboards with multi-source data integration, reducing reporting and analysis effort by **60%**.
- Designed and deployed operations dashboards consolidating KPIs into a unified view, improving cross-functional operational visibility and enabling data-driven decision-making.

EDUCATION

MBA - Business Analytics	DAVV University, SDSF Indore	CGPA: 7.81
PG Diploma in Adv. Computing	Sunbeam Institute, CDAC Acts	
Bachelor of Engineering - (CS)	IPS Academy, Indore	CGPA: 6.40

ACHIEVEMENTS

Awarded 1st place at an AWS workshop, officially recognized with rewards for outstanding performance.
